POWERING LIBYA'S NEXT ENERGY CHAPTER

24–26 November 2026 | Tripoli International
Conference Centre, Tripoli, Libya

The Libya Energy Show 2026 is the **first international exhibition and conference on Libyan soil**, under the full patronage of Masaud Suleiman, Chairman of the National Oil Corporation, Libya. **Taking place from 24–26 November 2026 at the Tripoli International Conference Centre In Tripoli, Libya, the event will bring together.**

- Senior NOC delegation
- Technical NOC delegation
- National Energy Companies
- International operators
- Energy Producers
- Service providers
- EPC contractors
- Infrastructure developers
- Equipment providers
- Financing and Banking sector

Across Oil, Gas, Renewables, Power, Electricity, Infrastructure sectors.

Explore new partnerships and opportunities across Libya's energy value chain.

LIBYES reflects Libya's broader energy ambitions expanding the conversation beyond hydrocarbons to include **energy infrastructure, services, technology and emerging energy solutions, expertise and investment.**

WHY LIBYA

With 1.3 million barrels of daily oil production, 16 exploration blocks still available, and Africa's largest proven oil reserves, Libya is your next energy investment destination.

"The National Oil Corporation (NOC) of Libya has recently highlighted a strategy focused on increasing production capacity and strengthening the energy sector through investment and partnerships.

The chairman, Masoud Suleiman, presented this vision at ADIPEC 2025, emphasizing stability and growth, with proven oil reserves of 48 billion barrels and a goal to maintain stable production to support economic development.

MASOUD SULEIMAN

WHY EXHIBIT AT LIBYES

A commercial hub for Libya and Africa

LIBYES Libya Energy Show 2026 is the commercial platform where policymakers, the Libya National Oil Corporation leadership, International Energy Companies, investors, and technology providers connect and where dialogue turns into strategic partnerships.

01.

CONNECT WITH LIBYA'S KEY ENERGY DECISION-MAKERS

LIBYES brings together the National Oil Corporation (NOC), its operating companies, and the service providers supporting Libya's production growth. Meet the companies responsible for delivering projects and expanding output.

03.

CONNECT WITH THE NOC ECOSYSTEM

Meet NOC affiliates, operators, EPC contractors, and service companies active across Libya's upstream sector. Build relationships across the industry executing Libya's production strategy.

05.

CREATE BUSINESS OPPORTUNITIES & MEET BUYERS

LIBYES focuses on direct engagement: **targeted meetings, commercial discussions, and partnerships** that support entry and expansion in Libya's energy sector.

02.

POSITION YOUR SOLUTIONS IN LIBYA'S MARKET

From **drilling and field services** to infrastructure and digital technologies, LIBYES connects **solution providers** with **operators** seeking practical capabilities to support operations and field development

04.

MAXIMISE BRAND VISIBILITY

Position your company in front of National Oil Companies, investors, international energy companies, and procurement leaders across the energy value chain. **Align your brand with Libya's energy ambitions & strengthen** your position in a market drawing increasing global attention.

THE ENERGY MEETING OF THE YEAR

Secure your place within Libya's booming Energy sector. **Meet the Libyan industry leadership and the business ecosystem** shaping the country's Energy future. Expect tangible outcomes, real meetings, and unique strategic content that will influence the region's energy landscape.

PREVIOUS SPONSORS & PARTNERS:

THE ENTIRE VALUE CHAIN PRESENT

UPSTREAM EXPLORATION & PRODUCTION

- Seismic Survey Equipment & Services
- Drilling Equipment & Technologies
- Well control, Testing & Completion Services
- Offshore Platforms & Equipment
- Optimisation & Digitalisation

MIDSTREAM & PIPELINE

- Pipeline Engineering, Construction & Maintenance
- Pipeline Laying, Cleaning & Inspection Technologies
- Pipes, Casings & Tubing Manufacturers
- Pumps, Compressors & Pumping System
- Digitalisation & AI

DOWNSTREAM & REFINING

- Refining Technologies & Equipment
- Petrochemical Processing Equipment
- Sulphur Recovery & Humidity Analysis Equipment
- Catalysts, Additives & Chemical Processing Solutions

HEALTH, SAFETY, SECURITY & ENVIRONMENT (HSSE)

- Safety & Security Equipment & Systems
- Firefighting & Emergency Response Equipment
- Environmental Monitoring-Emission Control Systems
- Personal Protective Equipment (PPE)
- Security

POWER & RENEWABLE ENERGY

- Power & Electricity
- Renewable Energy
- Energy Technologies
- Energy Efficiency Measurement
- Power Generation & Electricity Infrastructure
- Renewable Energy Development (Solar, Wind & Hybrid Projects)
- Utility-Scale Solar & Wind Technologies
- Energy Storage Solutions (Battery & Grid Storage Systems)
- Smart Grids & Grid Modernization Technologies

ENGINEERING, FABRICATION & INDUSTRIAL SERVICES

- Steel Structure Fabricators
- Mechanical & Electrical Engineering Services
- Engineering, Procurement-Construction Contractors
- Testing & Inspection Equipment & Service

WHY LIBYES?

Libya offers one of the most underleveraged yet high-potential energy markets in the Mediterranean, combining scale, proximity to Europe, and active sector redevelopment.

LARGEST OIL RESERVES IN AFRICA

~48 billion barrels of proven oil reserves with low extraction costs and high-quality crude. Significant upside through field redevelopment, enhanced recovery, and unexplored basins.

ESTABLISHED GAS POTENTIAL WITH EXPORT ACCESS

Substantial natural gas reserves supported by existing export routes to Europe (notably via the Greenstream pipeline to Italy), positioning Libya as a relevant supplier in Europe's diversification strategy.

DIRECT ACCESS TO EUROPEAN MARKETS

Geographic proximity reduces transport time and costs, giving Libya a structural advantage over more distant suppliers in both oil and gas exports.

INFRASTRUCTURE REBUILD & MODERNISATION

Ongoing need for upgrades across pipelines, storage, refining capacity, and power infrastructure—creating immediate opportunities for EPC contractors, technology providers, and service companies.

FULL VALUE CHAIN OPPORTUNITIES

Investment potential across upstream (exploration and production), midstream (transport and storage), and downstream (refining, petrochemicals), as well as power generation and renewables.

ENERGY TRANSITION ENTRY POINT

Growing interest in solar and renewable projects, leveraging Libya's high solar irradiance and available land, alongside conventional energy development.

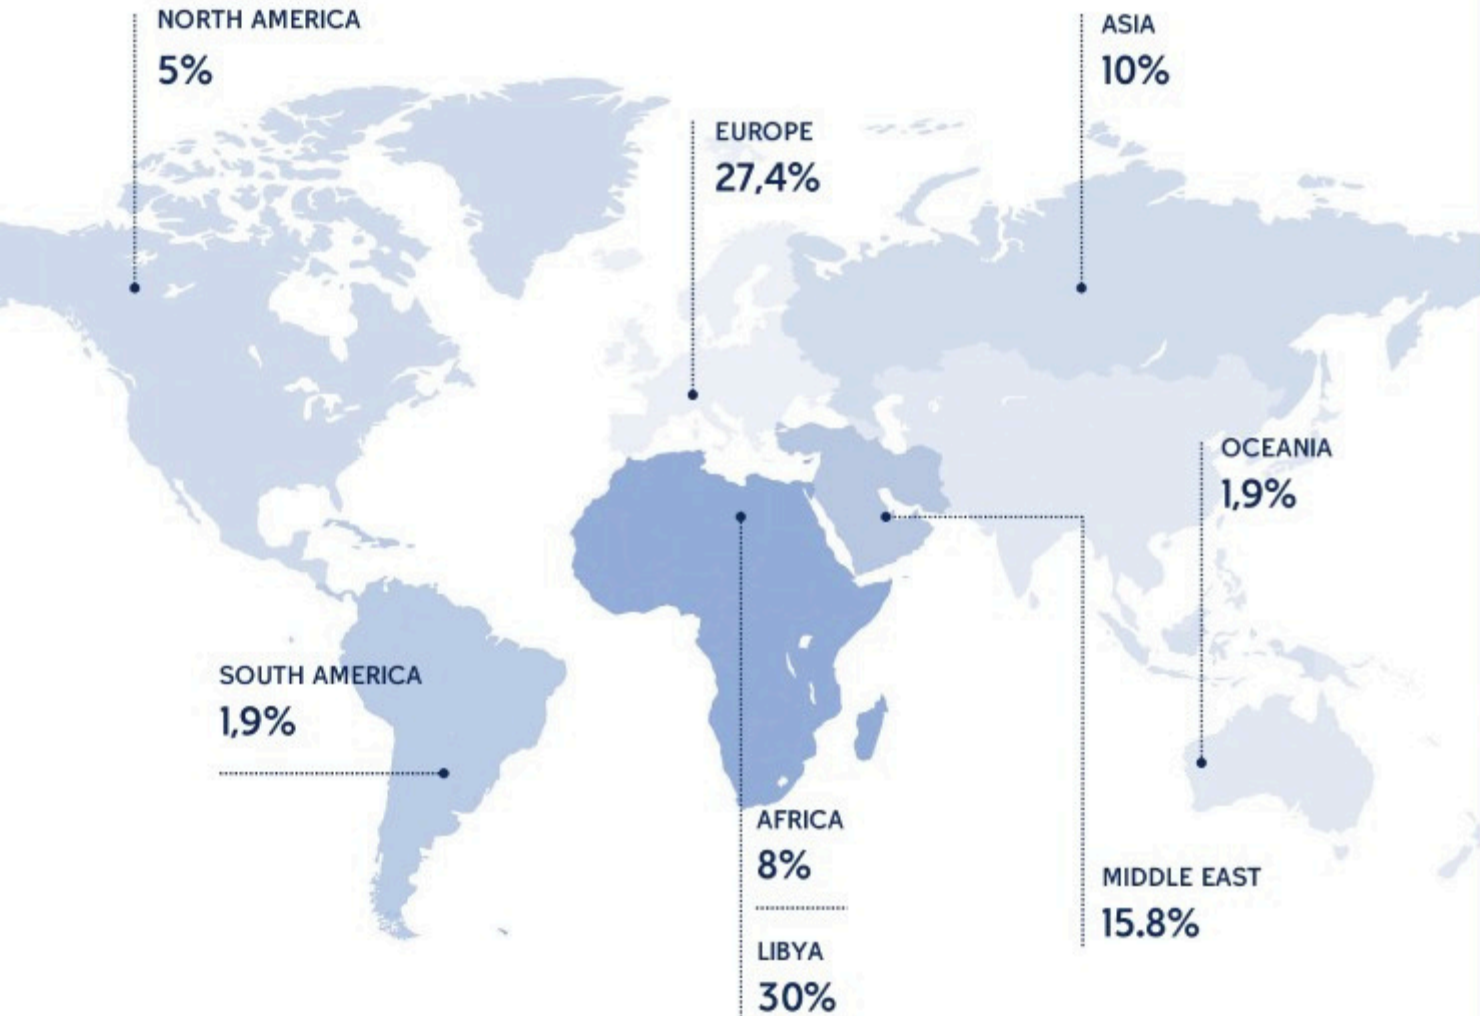

REOPENING TO INTERNATIONAL PARTNERSHIPS

Increasing engagement with international operators and service providers as Libya accelerates production and sector stabilization.

THE OPPORTUNITY

For investors and operators able to navigate emerging market dynamics, Libya offers scale, proximity, and first-mover advantage in a market undergoing active transformation.

CONNECTING LIBYA TO GLOBAL ENERGY MARKETS

Driving investment, partnerships & industrial growth

The LIBYES Country Pavilions bring together international energy leaders, providing services to the emerging and upcoming Libyan sector, creating a powerful platform for nations to showcase their capabilities and strengthen strategic partnerships within Libya's expanding energy sector.

FOR EXHIBITORS

The pavilions provide a prestigious national platform to highlight expertise, technologies, and services while strengthening visibility, credibility, and commercial reach within one of Africa's most promising energy markets.

FOR VISITORS

The country pavilions offer direct access to an international range of top services and products and emerging opportunities across upstream, downstream, infrastructure, maritime logistics, and energy services supporting Libya's energy expansion.

OVERVIEW LIBYES CONFERENCES

The LIBYES 2026 Conferences bring together global energy leaders, investors, and industry experts to explore the opportunities shaping Libya's evolving energy sector and its role in regional and global markets.

Through two dedicated programmes, Strategic and Technical, LIBYES delivers a regional and Libya-focused agenda of high-level discussions, in-depth dialogues, and technical sessions.

LIBYES STRATEGIC CONFERENCE

PROGRAMME:

- Global Energy Trends and Geopolitics
- NOC Strategy and Implementation
- Upstream Sector Updates
- Licensing Round updates & next steps
- Emerging technologies
- Offshore and Onshore Project Updates
- Leadership
- Gas and LNG
- Downstream and Midstream
- Innovation
- Renewable Energies
- Power Generation and Electricity
- Energy Infrastructure
- Investment and Financing

LIBYES TECHNICAL CONFERENCE

PROGRAMME:

- Oil & Gas Field Development and Production
- Geoscience, Exploration and Reservoir Engineering
- Drilling, Wells and Completion Technologies
- Offshore, Subsea and Marine Energy Systems
- Downstream, Refining and Energy Marketing
- Renewable Energy and Low-Carbon Technologies
- Digitalisation, Artificial Intelligence and Smart Energy Systems
- Operational Excellence and Asset Performance
- Environment, Sustainability and Climate
- Energy Transition
- HSSE (Health, Safety, Security and Environment)

LIBYES STRATEGIC CONFERENCE

The LIBYES Strategic Conference serves as a leading business platform for Libya's energy sector, bringing together **National Oil Company leadership, CEOs, investors, energy companies and global industry leaders** to discuss the future of Libya's energy industry and its role in regional and international markets.

The Strategic Conference provides a unique space for strategic dialogue between thought leaders, the NOC, its subsidiaries, and the international private sector, focusing on unlocking Libya's vast energy potential and strengthening partnerships that can accelerate investment, development, and long term growth- today and in the future.

As Libya continues to position itself as a key energy hub connecting Africa, the Mediterranean, and European markets, the LIBYES Strategic Conference will highlight the country's role in supporting global energy supply while creating new opportunities for international collaboration and technological advancement.

STRATEGIC CONFERENCE PROGRAMME INCLUDES:

Global Energy Trends and Geopolitics

NOC Strategy and Implementation

Upstream Sector Updates

Licensing Round updates & next steps

Emerging technologies

Offshore & Onshore Project Updates

Leadership

Gas and LNG

Downstream and Midstream

Innovation

Renewable Energies

Power Generation and Electricity

Energy Infrastructure

Investment and Financing

conference@libyes.com

LIBYES TECHNICAL CONFERENCE

The **LIBYES Technical Conference** brings together **engineers, geoscientists, technical specialists, researchers, and industry professionals** to explore the technologies, operational strategies, and **engineering solutions** shaping the future of Libya's energy sector.

The programme will focus on **key technical disciplines** including exploration and production technologies, field development, drilling and completions, geoscience, offshore operations, refining and downstream processes, as well as digitalisation and emerging technologies transforming energy operations.

TECHNICAL CONFERENCE PROGRAMME INCLUDES:

Oil & Gas Field Development and Production

Geoscience, Exploration and Reservoir Engineering

Drilling, Wells and Completion Technologies

Offshore, Subsea and Marine Energy Systems

Downstream, Refining and Energy Marketing

Renewable Energy and Low-Carbon Technologies

Digitalisation, Artificial Intelligence and Smart Energy Systems

Operational Excellence and Asset Performance

Environmental Sustainability and Climate Transition

HSSE (Health, Safety, Security and Environment)

LIBYES ENERGY VIP CLUB

In line with **LIBYES** and the **National Oil Corporation (NOC)** of Libya's mission to **strengthen global partnerships and accelerate investment in Libya's energy sector**, the **LIBYES Energy VIP Club** serves as an exclusive platform where senior decision-makers connect to shape the future of the industry.

The Club provides a private environment for top-level National Oil Company executives, global CEOs, investors, and industry leaders to engage in strategic discussions, explore investment opportunities, and build high-level partnerships supporting Libya's energy expansion.

Participation is **strictly reserved for senior leaders and key stakeholders across energy leadership, finance, technology, and operations**, ensuring that every interaction is meaningful, strategic, and focused on unlocking new opportunities in Libya's evolving energy landscape.

The **LIBYES Energy VIP Club** creates a trusted setting where influential leaders can exchange insights, align priorities, and strengthen collaboration across the global energy community.

EXCLUSIVE ACCESS FOR LIBYES ENERGY VIP CLUB MEMBERS:

Members-Only Private Lounge

Private Meeting Suites

Premium Networking with Senior Energy Leaders

VIP Concierge Services and Hospitality

THE LIBYES ENERGY VIP CLUB IS A STRICTLY MEDIA-FREE SPACE FOR CONFIDENTIAL DISCUSSIONS

LIBYES ENERGY VIP CLUB

LIBYES GALA DINNER

Held under the **patronage of the National Oil Corporation (NOC) of Libya**, the LIBYES Gala Dinner is the **executive networking event during the Libya Energy Show**. This exclusive, high-level gathering brings together top-level leadership from the NOC, global energy CEOs, investors, and industry leaders for an elegant evening of partnerships, dialogue, and relationship-building.

LIBYES MOCKTAIL NETWORKING RECEPTION

The LIBYES Mocktail Networking Reception offers a **relaxed yet high-level environment** for delegates, executives, and industry leaders to connect and expand their professional networks.

A more informal setting, the **mocktail encourages open dialogue, partnership exploration, and informal discussions** that foster new business opportunities and long-term collaboration.

EXCLUSIVE INVITATION- ONLY EXPERIENCES

Reserved for **senior decision-makers and key stakeholders** in the global energy industry, LIBYES VIP experiences are designed to **deepen strategic engagement, strengthen partnerships, and create meaningful connections** across the international energy community.
